

# How to transition from **Healthcare** to Data Science?

Swipe left →

# Areas of scope for data science in healthcare

1. Biotechnology
2. Digital health
3. Consumer genomics
4. Health management

Swipe left →

**Well, here we are with  
a bunch of ideas**

**Cut the hassle to be a pro  
Healthcare data  
professional!**

Swipe left →

# How to be a professional in health data science?

1. Skill up in statistics and SQL
2. Study BI reporting
3. Learn how to deal with big data
4. Study ML, statistical analysis

Swipe left →

# Learning resources you can consider

1. Practice Python with open sources
2. Learn data science or data analytics
3. Work in Kaggle collaborative projects
4. Projects with AI companies

Swipe left →

# Top-tier firms that use healthcare data science:

Swipe left →

# Top Applications in healthcare tech

**verily**

AI to detect diseases

 **IBM Watson**

Electronic healthcare

 **WATCH**

Track cardio vascular issues

Swipe left →

# Healthcare tech got improvised during Pandemic

Looking for the right training platform?

**We have got your backs!**

Swipe left →

# **Skillslash - For the best data science training!**

1. Customized course
2. Domain training
3. Placement assistance
4. Projects with certification
